we're on it.

Grinding machine for scraper blades – Our sharpest offer!

In combination with the original hard cast counter pressure cylinders, the scraper blades within our coating machines ensure that the backs of the coated sheets remain absolutely clean. Just like any other tool, also our scraper blades lose their sharpness with ongoing usage. Blunt scraper blades however lead to residual

coating on the hard cast cylinder. In extreme cases residues of coatings cannot be removed completely by the blades. The consequence: unwanted contamination of the backside of the sheets. For that reason it is essential to regrind the scraper blades regularly.

With the special grinding machine by Koenig & Bauer MetalPrint you can regrind scraper blades in different lengths fast, easy, economical and reproducible.

It is truly a professional equipment which allows parallel grinding of scraper blades at its best. The water-cooled grinding process together with fast and precise movements of the grinding head ensures highest processing speed and surface quality.

Grinding machine includes

- Grinding disc motor
- Grinding slide with 4 high precision bearings
- Tray for cooling fluid
- Very stable and compact ceramic grinding head
- Digital control system
- Electromagnetic table
- Magnetic cleaning device to remove residues of metal from the coolant circulation

Item No.	Description	Price in €
A91867	Grinding machine for scraper blades, water-cooled for optimum parallel grinding of scraper blades of different length.	€ 24,900

Original Koenig & Bauer MetalPrint scraper blades in high quality finish are now also available at very beneficial rates:

Item No.	Description	Special price when ordering 5 pieces	Special price when ordering 10 pieces
A30040	Original Koenig & Bauer scraper blades for coating machines 431 and 460 in high quality finish	per blade € 460,-	per blade € 430,-
14185	Original Koenig & Bauer scraper blades for coating machines 4040, 470, 480, 483, 490 in high quality finish	per blade € 540,-	per blade € 495,-
