# Printing blanket MetalPremium Neo – Quality brought to the point!

In offset printing the blankets transfer the dots to be printed from the printing plate to the sheet. However, the correlation between a consistently high print quality and the quality of the blanket is often underestimated. The printing blanket MetalPremium Neo has been developed by Koenig & Bauer to match perfectly with the unique requirements of MetalStar and Mailänder printing presses. The result: a reproducible and high print quality with even and saturated solids as well as the precise dots. MetalPremium Neo, the first printing blanket particularly for metal printing.

Due to the special film carrier this blanket possesses an extremely high dimensional stability. This ensures a stable production without stretching or sinking and without manual re-adjustment of tension even after many thousand prints.

Furthermore, MetalPremium Neo can be easily stripped to match the actual print format. This reliably prevents the so called „picture framing“ effect as well as ink build-up on the impression cylinder. In this way the effort for

cleaning the impression cylinders can be significantly reduced.

Stripped printing blankets can simply be stored and re-used for the next job with a similar sheet size. In this way the consumption of blankets can be effectively lowered.

Of course the composition of this printing blanket is exactly geared to the requirements of metal decorating. It is made of a highly stable thermoplastic film carrier as a base, optimised compressible and stabilising layers and a synthetic rubber surface. Due to the overall thickness of 2.35 mm, no more packing sheets are required. This saves time and money with every blanket change. Finally, by means of the Rapid Blanket Change (RBC) device the set-up time for a blanket change can be cut down to only two minutes. MetalPremium Neo is available for UV inks, conventional inks as well as hybrid printing.

## MetalPremium Neo: The first printing blanket specifically developed for metal decorating.

- The top layer of the blanket can be stripped to avoid picture framing
- Fast and easy blanket change
- Extended cleaning intervals of the impression cylinder
- Omission of packing sheets saves time and money
- High dimensional stability for repeatable print quality
- Reduced consumption of blankets

Item No.	Description	For equipment	Special price when ordering > 100 pieces
A89099	<b>Printing blanket MetalPremium Neo UV</b> 1275 x 1220 mm; for UV printing	Metalstar 3 Mailänder 280	per piece <b>€ 149,-</b>
A89100	<b>Printing blanket MetalPremium Neo Combi</b> 1275 x 1220 mm; for conventional inks or hybrid printing	Metalstar 3 Mailänder 280	per piece <b>€ 149,-</b>
E24288	<b>Printing blanket MetalPremium Neo UV RBC</b> 1210 x 1180 mm; for UV printing	exclusively for MetalStar 3 with Rapid Blanket Change (RBC)	per piece <b>€ 139,-</b>
A85254	<b>Printing blanket MetalPremium Neo Combi RBC</b> 1210 x 1180 mm; for conventional inks or hybrid printing		per piece <b>€ 139,-</b>

All prices are subject to the addition of value-added tax at the legally stipulated rate. This special offer cannot be combined with any other promotions, discounts or rebates and is subject to change without further notice. Errors and omissions excepted.
