Quality & Performance Packages for Maximum Output and Print Quality

Modular and
Economically

we're on it.

Quality & Performance Packages for Maximum Output and Print Quality – Modular and Economically.

With each of the Quality & Performance Packages you have access to our pool of qualified printers and instructors. The Quality & Performance Packages are available for all printing presses of type MetalStar 2, MetalStar 3 and Mailänder 280.

Quality & Performance Package “operator training”

per week 7,000 EUR

- Onsite training performed by our knowledgeable and experienced instructors
- Printing process and application training, machine maintenance or individual trainings geared to your specific needs

Quality & Performance Package “printing unit”

per printing unit 1,250 EUR

- Check and adjustment of bearer rings
- Check and adjustment of the packing of the blanket cylinder
- Check and adjustment of plate cylinder and foil, replacement foil if necessary
- Check and adjustment of ink zones
- Check of clamping bars of plate cylinder and zero-setting
- Material required on-site at the time of intervention:
 - Test forms for zero-setting of the clamping bars
 - Calibrated layer for blanket cylinder
 - New foil for the plate cylinder

Quality & Performance Package “register test”

lump sum 1,250 EUR

- Test printing the machine with a special test form
- Measuring the test sheets with Luchs measuring device
- Detailed evaluation and documentation of the results as well as recommendations for further improvements

Quality & Performance Package “print colour management”

lump sum 1,250 EUR

- Test printing the machine with a special test form (“fingerprint”)
- Assistance in checking and adjusting the CTP curve (reference values must be available upfront)
- Detailed evaluation and documentation of the results as well as recommendations for further improvements

Quality & Performance Package “dampening solution”

per unit 1,250 EUR

- Check and calibrate the pH measuring device
- Check and calibrate the additives
- Check and calibrate the conductivity probes (depending on type)
- Check and clean the water circulation by using special detergent
- Check and calibrate conductivity values
- Material required on-site at the time of intervention:
 - special detergent

Quality & Performance Package “wash-up device”

per printing unit 1,250 EUR

- Check and adjustment of wash-up blades, replacement if necessary
- Check and clean the washing beams and spray nozzles
- Dismantle, check, clean and re-install the spray tubes
- Check and adjust washing programs for rollers, blanket cylinder & impression cylinder
- Material required on-site at the time of intervention:
 - New wash-up blades

The inking and dampening units are the heart of any printing press. A reproducible, high quality print result is always dependent on an optimally equipped inking and dampening unit.

Our recommendation: replace now the inking and dampening rollers on your metal decorating press! To aid your decision, we have developed specifically tailored roller packages at surprisingly favourable conditions.

Quality & Performance Package “installation & adjustment of inking & dampening rollers”

per printing unit 1,250 EUR

Overtime supplements may be due outside the normal business hours of Koenig & Bauer MetalPrint, which are from 7.00 a.m. to 7.00 p.m., Mondays to Fridays (max. 10h/day). Travel and accommodation costs, daily travel allowances for the technicians as well as spare parts and consumables are not included in the above prices and will be charged separately as incurred. All prices are subject to value-added tax at the legally stipulated rate. Errors and omissions excepted.

Valid until March 31, 2024
