# Gripper service packages for printing presses – Get a grip on it!

The grippers are among the press components which are most decisive for smooth and precise sheet transport. Any compromises with regard to the quality of the grippers will automatically lead to negative impacts on sheet alignment and guiding. The result: Quality problems such as colour deviations and doubling.

All our grippers and gripper pads were designed by Koenig & Bauer MetalPrint to meet the specific requirements of metal decorating. Each individual gripper is manufactured to the highest quality standards, observing extremely precise tolerances. Furthermore, original Koenig & Bauer MetalPrint grippers possess a special surface optimised for the handling of metal sheets. This guarantees perfect holding forces, a long service life and stable, register-true sheet transport.

With a gripper service package from Koenig & Bauer MetalPrint, you are opting for top print quality and for the productivity and sustained value of your printing line.

## Our recommendation

Have the grippers of your metal decorating press replaced and adjusted by a Koenig & Bauer MetalPrint service technician. Therefore we have developed the gripper service package with its surprisingly favourable terms.

## Our special service package includes

- all gripper tips and gripper pads for infeed drum, swing feed unit, impression cylinder and transfer drum.
- professional installation by a skilled technician
- As an option you can exchange the existing gripper springs by new reinforced gripper springs – for even more grip and a reliable production process

**Get a grip on our gripper service package at a special price. In that way you can enjoy savings of up to 30 % compared to the regular price.**

We would be pleased to send you an individual offer quoting an attractive price.
