Let it flow!

we're on it.

Upgrade 8.10

Pneumatic package for feeder 770, 780 and 4050 – Let it flow!

At Koenig & Bauer, we are working continuously on innovations to further improve your printing and coating lines. With our hardware upgrades you stay up-to-date with the latest technological developments. In that way you continue to decorate metal sheets to the highest standards.

Every feeder needs for its operation a lot of suction air and blast air. A good and reliable air supply is particularly required for separating and lifting the sheets from the pile as well as for smooth sheet transportation into the infeed table. To meet increasingly demanding expectations we have re-engineered and improved important components that are critical to a perfect air supply, e.g. by using exceptionally durable control valves. All to make your printing or coating lines even more reliable, productive and stable.

Our special recommendation

Replace now your old oil-lubricated vacuum pump against our new oil-free rotary vane pump. This vacuum pump operates completely dust and oil free and delivers sufficient and non-fluctuating air for a reliable production – sheet by sheet. With only one shaft and its direct drive technology this pump is designed for long life and minimal wear. This reduces unwanted downtime and maintenance requirements of your line. Together with

Item No.	Description	Suitable equipment	Price in €
E42013	Upgrade 8.10	Feeders of type 780	€ 4,990
E42194	Pneumatic package for feeder	780-037 to 780-118	
E42246	including	Feeders of type 780	
E42405	• 2 heavy duty valves for blast air	780-001 to 780-036	
	• 2 heavy duty valves for suction air	Feeders of type 4050	
	• 2 glycerin manometers		
	• New air hoses		
	• Corresponding mounting material and small parts	Feeders of type 770	

an excellent degree of efficiency and significant lower energy consumption this saves a lot of money to improve your bottom line. To ensure fast and easy installation this original vacuum pumps is completely pre-assembled specifically for the operation in our feeders.
