

Rear Edge Magnetic Sheet Separation

METALWING and METALSTAR 1

Combine quality improvement with production security!

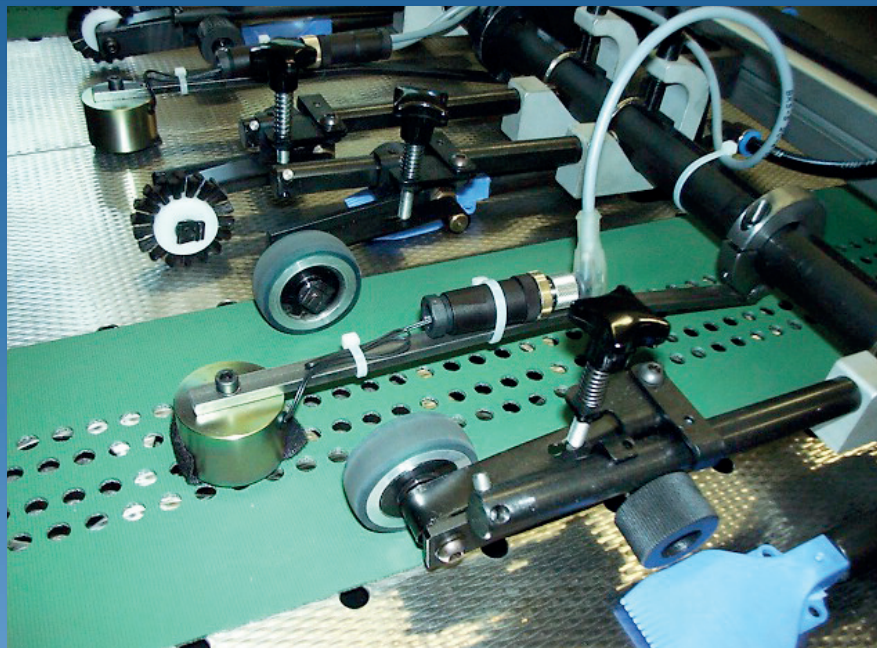

The Advantages

Your Benefit

■ Can be used on both scroll and rectangular sheets	Production flexibility, no setup times
■ Optimized sheet transport without damage	Reduced spoilage costs
■ No adjustment necessary	Time saving
■ Reduced compressed air consumption	Cost saving and noise reduction
■ Greatly improved sheet transport	Higher production speed
■ Maintenance free	Lower production costs

Electromagnets are fixed on the infeed table and are clocked to lift the back edge of the sheet being fed, so ensures that the air blast system gives maximum sheet separation.

This avoids scratching of sheets and existing coatings hence producing consistently higher quality, productivity. It also allows the consumption of compressed air to be reduced thus pushing down running costs.

Depending on the technical configuration of your equipment, we can offer a comprehensive consultancy service which will include supplying you with a quotation specifically tailored to your needs.
