

UPGRADE 10.1

Pressure roller – simultaneous adjustment

For coating machines Mailänder series 430 and 460

Ease of operation and quality with one simple move!

The adjustment of the metering roller to the lacquering cylinder can be carried for both sides from the operating position by one person. Scale markings on the wheel produce a quick and accurate result without the need for hand tools.

The old arrangement required adjustment by two people on the drive and operator sides of the machine.

The advantages	Your benefit
<ul style="list-style-type: none"> Simple and precise adjustment 	<ul style="list-style-type: none"> Quality improvement, minimum waste
<ul style="list-style-type: none"> Singlehanded control 	<ul style="list-style-type: none"> Higher productivity by minimization of the set-up time
<ul style="list-style-type: none"> User friendly one-side adjustment 	<ul style="list-style-type: none"> Savings in operator time

Depending on the technical configuration of your equipment we can offer a comprehensive consultation service. We will be pleased to supply you with a quotation tailored to your specific needs. Please feel free to contact us.
