

Pneumatic scraper blade

For coating machines Mailänder series 460 and LTG 4040

Maximize the life of your scraper blade!

The mechanical scraper blade engagement system is replaced by two pneumatic cylinders. This allows the pressure between the blade and the impression cylinder to be kept constant through continual manometer measurement and fine adjustment system.

The advantages	Your benefit
<ul style="list-style-type: none"> Constant blade pressure on the impression cylinder 	<ul style="list-style-type: none"> Reduced blade and cylinder wear
<ul style="list-style-type: none"> Increased blade life 	<ul style="list-style-type: none"> Greater operational availability and lower spare parts costs
<ul style="list-style-type: none"> No mechanical spare parts needed 	<ul style="list-style-type: none"> Assembly and forget
<ul style="list-style-type: none"> Constantly optimum adjustment 	<ul style="list-style-type: none"> No operating errors

Depending on the technical configuration of your equipment we can offer a comprehensive consultation service. We will be pleased to supply you with a quotation tailored to your specific needs. Please feel free to contact us.
