

# UPGRADE 11.3

## Contact-free overpiling switch on the feeder

### For MetalStar 2

#### Contact-free and wear-free!

The feeder of the MetalStar 2 was originally equipped with a mechanical and maintenance-intensive overpiling switch. This upgrade replaces this switch with a contact-free ultrasonic sensor.

The switching position is infinitely adjustable using a teach-in procedure. A safety limit stop switch to protect the suction head is mounted outside the sheet path.

This upgrade is suitable for all MetalStar 2 type presses

The advantages	Your benefit
