

UPGRADE 2.1

 KBA-MetalPrint

Printing Cylinder Sheet Monitoring

METALWING and METALSTAR 1

Maximize your production security!

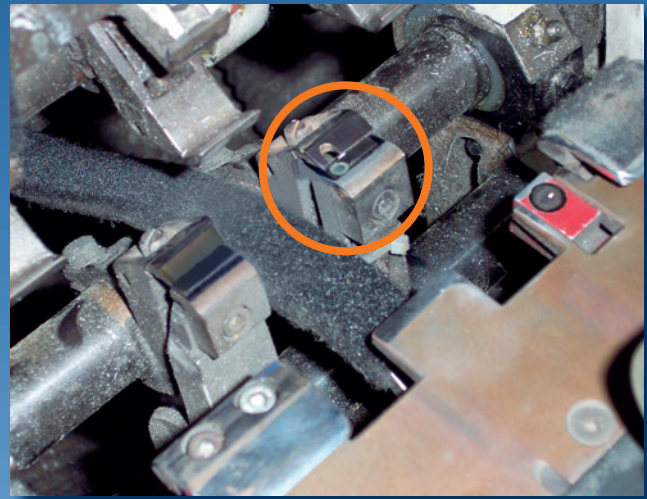

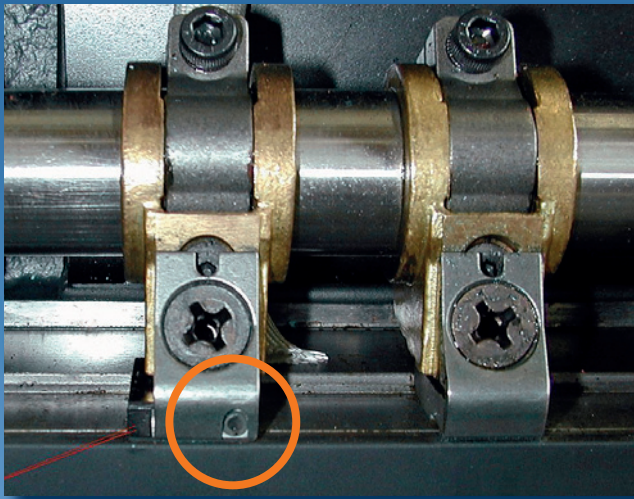

The Advantages

- Protection against sheet loss
- Rapid automatic switch-off

Your Benefit

- Minimization of damage and reduced downtime
- Minimization of sheet spoilage
- Increase of production speed and security

Two additional sensors are fitted to each gripper system to continually monitor the sheets on the printing cylinder – in addition to those in the transfer drum area. Should a sheet get out of position, the machine goes in to a rapid stop condition which avoids major machine damage and loss of good sheets.

Depending on the technical configuration of your equipment, we can offer a comprehensive consultancy service which will include supplying you with a quotation specifically tailored to your needs.

Please feel free to contact us at any time!
