

Side Lay Light Barrier Sensor

METALWING und METALSTAR 1*

Excellent production security!

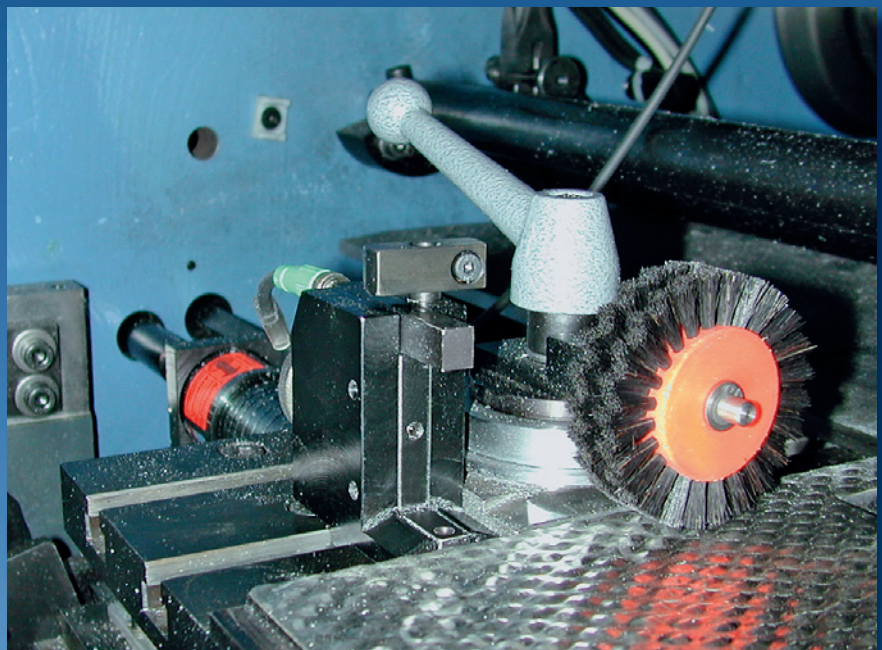

The Advantages

- Fast repositioning of the feeder side guides via the rapid clamping system
- Suitable for most types of sheets
- Precise adjustment possible
- Not affected by dirt

Your Benefit

- Reduced change over times
- No adjustment necessary when changing to scroll sheets / straight cut
- Higher production security
- Higher production security

The light barrier which checks the lateral sheet alignment can be used for most sheet configurations and the rapid action clamping system allows the feeder to be adjusted quickly. The system reduces the complications of sheet size changes and is not adversely affected by dirt.

* Not retrofitable for machines with Zirconium feeders.

Depending on the technical configuration of your equipment we can offer a comprehensive consultation service. We will be pleased to supply you with a quotation tailored to your specific needs.
