

E-Modification

For multi-colour printing presses type MetalStar 1 and MetalWing

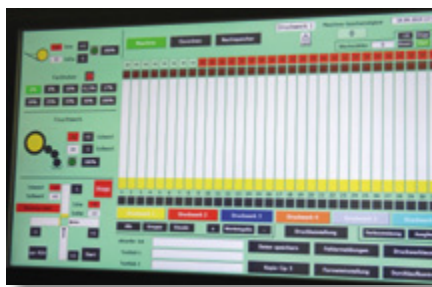

Fountain of youth for your printing press!

In order to adapt your MetalStar 1 metal decorating press to current market requirements and to ensure a high level of availability in terms of productivity and the supply of spare parts, KBA-MetalPrint has developed a new press control system: E-Modification.

This modern control console combines all of the functions of the press, the ink zones and the format adjustment in one Siemens S7 controller. The operating concept has been simplified and adapted to meet the needs of metal decorating. An easy-to-read touch display shows print-relevant setup data, for example of the damping unit, the ink zones and the duct roller speed.

This upgrade is suitable for all MetalStar 1 and MetalWing printing presses.

The advantages	Your benefit
<ul style="list-style-type: none"> Modern control system 	<ul style="list-style-type: none"> Simpler operation High level of press availability
<ul style="list-style-type: none"> Comprehensive fault messages 	<ul style="list-style-type: none"> Help to remedy the fault quickly
<ul style="list-style-type: none"> New job management 	<ul style="list-style-type: none"> Reduction of setup times
<ul style="list-style-type: none"> Remote maintenance 	<ul style="list-style-type: none"> Assistance in troubleshooting

Functional operation

Addressing the ink zone motors

Depending on the technical configuration of your equipment we can offer a comprehensive consultation service. We will be pleased to supply you with a quotation tailored to your specific needs. Talk to our Mr. LineOptimiser!
