

UPGRADE 3.1

 KBA-MetalPrint

Automatic Suction Head Height Setting

For all SPRINT multi-colour printing machines

Production security by automation!

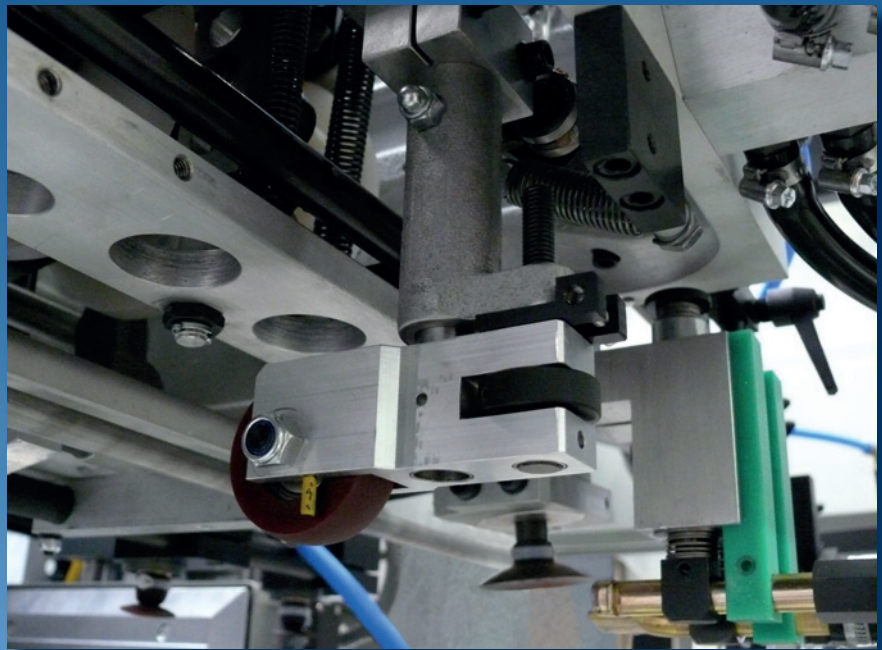

The Advantages

- Automatical compensation of stack heights
- Consistant sheet guiding
- Avoids double and waste sheets
- Maintenance free

Your Benefit

- Minimization of set up time costs
- Increasing of productivity
- Higher processing reliability
- Lower running costs

The stack height sensor registers the position of the stack top edge and sets the suction head to the ideal working position. During operation the suction head is continually levelled in a stepless motion to ensure that the distance from the suckers to the top of the stack is kept constant.

Depending on the technical configuration of your equipment, we can offer a comprehensive consultancy service which will include supplying you with a quotation specifically tailored to your needs.
