

Fine alignment vacuum valve

For all Sprint multi-colour printing machines

Increase your flexibility and productivity!

A pneumatic valve is moved by compressed control air to give fine alignment of the vacuum thus compensating for different sheet types and quality.

This is a simple modification that can be fitted in one day.

The advantages	Your benefit
<ul style="list-style-type: none"> ▪ Increase of the switching security 	<ul style="list-style-type: none"> ▪ Higher quality by ideal alignment of the vacuum for different sheet types
<ul style="list-style-type: none"> ▪ Avoiding front edge damage of the sheet (thin & soft sheets) 	<ul style="list-style-type: none"> ▪ Higher quality – satisfied customers ▪ Greater flexibility in the choice of sheet types
<ul style="list-style-type: none"> ▪ Ideal processing of follow-up components 	<ul style="list-style-type: none"> ▪ Improvement of productivity
<ul style="list-style-type: none"> ▪ Maintenance free 	<ul style="list-style-type: none"> ▪ Cost saving

Depending on the technical configuration of your equipment we can offer a comprehensive consultation service. We will be pleased to supply you with a quotation tailored to your specific needs. Please feel free to contact us.
