

UPGRADE 3.3

Second Vacuum Valve Impulse for fine Sheet Alignment

For all SPRINT multi-colour printing machines
Optimize the precision of your sheet re-register!

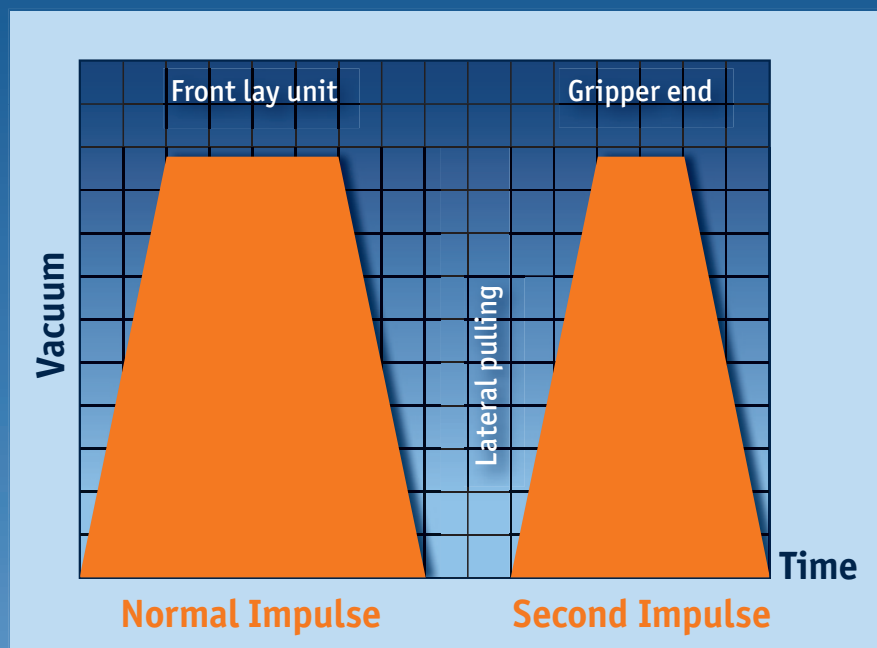

The Advantages

- Additional sheet alignment at the gripper end
- Ideal for re-register operation
- Maintenance free

Your Benefit

- Increased productivity by improved machine security
- Higher quality – satisfied customer
- Cost saving

By a second impulse of the fine alignment vacuum valve, shortly before the grippers close, the sheet is fed again smoothly giving precise registration on the front lay mark thus sheet bounce back is corrected in the swing gripper unit.

Depending on the technical configuration of your equipment, we can offer a comprehensive consultancy service which will include supplying you with a quotation specifically tailored to your needs.
