

Forwarding sucker control – feeder

For all Sprint multi-colour printing machines

Production security through ideal sheet feeding!

The rear forwarding suckers move independently from the front forwarding suckers by means of a modified mechanical control cam. This allows a precise transfer of the sheets from the separating suckers to the forwarding suckers.

The advantages	Your benefit
<ul style="list-style-type: none"> Precise sheet separation and feeding 	<ul style="list-style-type: none"> Greater machine reliability
<ul style="list-style-type: none"> Optimized sheet monitoring 	<ul style="list-style-type: none"> Improved productivity
<ul style="list-style-type: none"> Maintenance free 	<ul style="list-style-type: none"> Reduced costs

Depending on the technical configuration of your equipment we can offer a comprehensive consultation service. We will be pleased to supply you with a quotation tailored to your specific needs. Please feel free to contact us.
