

Teflon[®]-coated ink duct

For all Sprint multi-colour printing machines

Minimize your change-over times!

The Teflon[®] coat minimizes the friction between the ink and the ink duct which produces a more even colour distribution within the duct and makes cleaning easier for the operator.

We can offer you a ink duct exchange system in which we supply refurbished Teflon[®] coated units in return for your old ducts.

The advantages	Your benefit
<ul style="list-style-type: none"> ▪ Teflon[®]-coated surface gives rapid cleaning 	<ul style="list-style-type: none"> ▪ Reduced change-over times ▪ Reduced health risks for operator working conditions
<ul style="list-style-type: none"> ▪ Reduction of solvent consumption 	<ul style="list-style-type: none"> ▪ Reduced material costs and environmentally friendly
<ul style="list-style-type: none"> ▪ Improved colour distribution 	<ul style="list-style-type: none"> ▪ Increased printing quality and reduction colour control adjustment time

Depending on the technical configuration of your equipment we can offer a comprehensive consultation service. We will be pleased to supply you with a quotation tailored to your specific needs. Please feel free to contact us.
