

UPGRADE 5.3

Delivery with round belt

For type 4040 and 470 coating machine

A clean solution!

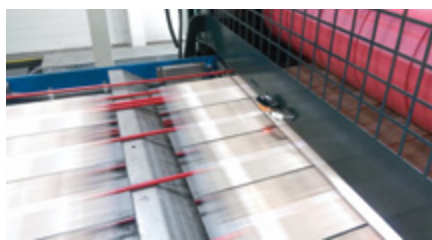

The use of round belts reduces the contact surface of the metal sheets, thus minimising dirt accumulation through varnish residues on the belts.

The advantages	Your benefit
<ul style="list-style-type: none"> Less varnish residue on the round belts compared to flat belts thanks to the reduced contact surface 	<ul style="list-style-type: none"> Fewer impurities on the undersides of the sheets through reduced contact surface and fewer contact points
<ul style="list-style-type: none"> Reliable sheet transportation through reduced contact surface 	<ul style="list-style-type: none"> Stable sheet transportation
<ul style="list-style-type: none"> Simplified operation with lateral adjustment of the guide rollers for changing formats, compared to flat belts 	<ul style="list-style-type: none"> Reduction of setup times when changing formats thanks to easier operation

This upgrade is suitable for the following coating machines:

Type 4040 coating machines: All series

MetalCoat 470: From machine no. 470-001 up to and including 470-091

Depending on the technical configuration of your equipment we can offer a comprehensive consultation service. We will be pleased to supply you with a quotation tailored to your specific needs. Please feel free to contact us.
