

## Burner KXB 2.0

### For TNV and EcoTNV

#### Some like it hot!

Higher preheating temperatures represent new challenges to material and design. In order to meet the changed requirements, we have developed a completely new KXB 2.0 burner with a new type of cone. Thanks to its special design, the KXB 2.0 burner compensates for the greater heat, thus protecting the cone from damage. This means that the burner works at a consistent performance level. This in turn extends the service life and reduces the maintenance required.

For LTG EcoTNV and standard TNV with air flow rates 8 000 to 12 000 nm<sup>3</sup>/h manufactured from 1995.

Upon request.

The advantages	Your benefits
<ul style="list-style-type: none"> <li>▪ Controlled heat distribution</li> </ul>	<ul style="list-style-type: none"> <li>▪ Longer service life</li> </ul>
<ul style="list-style-type: none"> <li>▪ Constant burner performance</li> </ul>	<ul style="list-style-type: none"> <li>▪ Greater production reliability</li> </ul>
<ul style="list-style-type: none"> <li>▪ Tapered form is preserved</li> </ul>	<ul style="list-style-type: none"> <li>▪ Lower maintenance costs</li> </ul>
<ul style="list-style-type: none"> <li>▪ One standard size</li> </ul>	<ul style="list-style-type: none"> <li>▪ Reduced stock inventory</li> </ul>

Depending on the technical configuration of your equipment we can offer a comprehensive consultation service. We will be pleased to supply you with a quotation tailored to your specific needs. Please feel free to contact us.
