

UPGRADE 8.1

Feeder stack height sensor

For feeder Mailänder series 730, 732 and 770

Combine production security and quality!

The new height sensor detects the stack height on the rear edge of the top sheet and is carried out without causing any damages. The special geometry and sensor technology enables perfect stack level regulation and hence consistently sheet feeding in to the machine.

The advantages	Your benefit
<ul style="list-style-type: none"> Precise stack height control produces consistently smooth sheet transportation 	<ul style="list-style-type: none"> Minimization of sheet spoilage resulting in higher productivity
<ul style="list-style-type: none"> Damage free sensing on the sheet rear edge 	<ul style="list-style-type: none"> Improved quality
<ul style="list-style-type: none"> Maintenance free 	<ul style="list-style-type: none"> No maintenance costs

Depending on the technical configuration of your equipment we can offer a comprehensive consultation service. We will be pleased to supply you with a quotation tailored to your specific needs. Please feel free to contact us.
