

Stop & Turn pile lifting

For type 4050 and 780 feeders

Easy alignment of the pile of sheets!

Thanks to the installation of the new Stop & Turn pile lifting device, a pile of sheets that was not placed on the roller conveyor at right angles can subsequently be aligned. The pile of sheets is aligned with the front stop rails by means of an automated turning mechanism. It is no longer necessary to move the pile of sheets back and forth manually.

Retrofitting is especially recommended for machines standing on a base, since this means that no foundation work is necessary.

This upgrade is suitable for all type 4050 and 780 feeders.

The advantages	Your benefit
<ul style="list-style-type: none"> Automatic alignment of the pile of sheets 	<ul style="list-style-type: none"> Reduction of makeready times to a minimum
<ul style="list-style-type: none"> Especially recommended for alternating operating personnel 	<ul style="list-style-type: none"> Improvement in quality and productivity
