

UPGRADE 9.1

KBA ColorTronic – remote inking control system For Mailänder printing presses types 121 and 122 / 122A

Improve your quality and save time!

The new KBA ColorTronic remote inking control system eliminates the complex manual setting and readjustment of the ink zones. The printing staff saves the settings for each printing unit in the control panel and simply recalls this print job the next time. The result is a consistently high level of quality, as well as significant time savings when starting up production.

The KBA ColorTronic consists of the central control panel with colour monitor as well as ISO lighting, electromotive ink zone adjustment and the complete ink duct with a ceramic-coated ink duct roller.

The advantages	Your benefit
<ul style="list-style-type: none"> Central, clearly arranged control panel for all printing units 	<ul style="list-style-type: none"> Time savings – higher productivity
<ul style="list-style-type: none"> Job data are saved, ensuring reproducible quality 	<ul style="list-style-type: none"> Consistently high quality – satisfied customers
<ul style="list-style-type: none"> Simple, precise and rapid operation 	<ul style="list-style-type: none"> Reduced set-up times resulting in significant cost reductions
<ul style="list-style-type: none"> Ceramic-coated ink duct roller 	<ul style="list-style-type: none"> Low wear – long service life

Ink duct with ceramic-coated roller

Depending on the technical configuration of your equipment we can offer a comprehensive consultation service. We will be pleased to supply you with a quotation tailored to your specific needs. **Please feel free to contact us.**
