Upgrade 1.4

Feeder Package for MetalStar 3 – Take It to the Next Level!

With the innovative hardware upgrades from Koenig & Bauer, your equipment stays up to date enabling metal decoration at the highest level.

Take the performance of your MetalStar 3 feeder to the next level – with our tailor-made upgrade package!

Selective improvements and adjustments increase the stability and production reliability of your feeder and significantly reduce production downtime. Benefit from innovative optimisations that improve the entire process – from precise feeding of the sheets to perfect infeed.

Benefit from these optimisations:

- **Smooth infeed:**
Mechanical adjustments, especially at the infeed, reliably prevent the sheets from catching and rotating, especially with very thin sheets or scroll sheets.
- **Optimum separation:**
New strippers and nozzles ensure improved separation of the sheets at the suction head.
- **Adapted control:**
Adapted and optimised control angles and control curves improve the functional sequence, while modified sensors reliably monitor the process.

We would be pleased to send you an individual offer quoting an attractive price.

Your benefits

- **Minimised downtimes:**
Avoid production interruptions thanks to optimised handling of the metal sheets.
- **Higher output:**
Fewer production interruptions means more good sheets and higher productivity.
- **Relief for operators:**
Reduced workload for operators as fewer sheets have to be removed from the machine due to an interruption.
- **Future-proof:**
Use the latest technology and increase your production efficiency and competitiveness.

Installation and commissioning of the upgrade to be performed by a qualified service technician from Koenig & Bauer. The labour, travel and accommodation costs, as well as daily travel allowances for the technician, will be charged separately as incurred.

Errors and omissions excepted.
