we're on it.

Upgrade 11.2

LED Standard Lighting for Colour Matching – Always in the Best Light!

With the innovative hardware upgrades from Koenig & Bauer, your equipment stays up to date enabling metal decoration at the highest level.

The RoHS directives signal the end of fluorescent lamps: mercury-containing fluorescent lamps may only be sold in the EU until February 24, 2025. Even outside the EU, the impact is noticeable as major manufacturers in Europe and China have already largely ceased production.

Upgrading to LED standard lighting (CIE D50) for colour matching is future-proof, environmentally friendly, and low-maintenance.

Your benefits

- Standard LED light D50 CIE
- Optimal illumination and homogeneity
- Reduced maintenance due to the elimination of bulb replacement
- Dimmer function for brightness adjustment
- Programmable and storable settings
- UV component switchable on and off

Item No.	Description	Suitable equipment
E65491	Upgrade 11.2 LED standard lighting	MetalStar 3 and Mailänder 280 series
E66304	Upgrade 11.2 LED standard lighting for control desk with square design	MetalStar 2 series
E66061	Upgrade 11.2 LED standard lighting for control desk with round design	MetalStar 2 series

Installation and commissioning of the upgrade to be performed by a qualified service technician from Koenig & Bauer. The labour, travel and accommodation costs, as well as daily travel allowances for the technician, will be charged separately as incurred.

We would be pleased to send you an individual offer quoting an attractive price.
