Upgrade 11.5

Washing during Production – with DriveTronic SRW

With the innovative hardware upgrades from Koenig & Bauer, your equipment stays up to date enabling metal decoration at the highest level.

With the new DriveTronic SRW (Simultaneous Roller Washing) update, you can clean your inking rollers during ongoing production – without downtime and with maximum efficiency! The innovative technology for simultaneous roller washing ensures clean printing results and saves valuable time. Benefit from shorter cleaning cycles, higher throughput and reduce production interruptions to a minimum. Rely on DriveTronic SRW and take your print quality and productivity to the next level!

Your advantages at a glance

- **Maximum time savings:**
Time-consuming washing can be done during production
- **Clean results:**
Multiple washings are possible without wasting time
- **Easy to use:**
Washing program can be started conveniently at the push of a button

The DriveTronic SRW update is available for all MetalStar 3 and MetalStar 4 printing machines that are equipped with DriveTronic SRW.

Installation and commissioning of the upgrade to be performed by a qualified service technician from Koenig & Bauer. The labour, travel and accommodation costs, as well as daily travel allowances for the technician, will be charged separately as incurred.

We would be pleased to send you an individual offer quoting an attractive price.
