**Upgrade 5.1/10.3**

# Flexo Scraping System for Coating Machines

Fast & Easy!

we're on it.

## Upgrade 5.1/10.3

# Flexo Scraping System for Coating Machines – Fast & Easy!

At Koenig & Bauer, we are working continuously on innovations to further improve your printing and coating lines. With our hardware upgrades you stay up-to-date with the latest technological developments. In that way you continue to decorate metal sheets to the highest standards.

In combination with our original hard cast cylinder, the scraper blade ensure that the backs of the coated sheets remain absolutely clean.

The Flexo scraping system includes a quick clamp support which carries the scraper blade. This allows a very fast replacement of a worn-out scraper blade. The Flexo scraping system includes a scraper blade as well as an additional quick clamp support. In this way the worn out scraper blade can be re-grounded and prepared for the next insertion while the production is running. The existing scraper blades can be re-used after installation of this upgrade.

### Our recommendation

Original Koenig & Bauer MetalPrint scraper blades in high quality finish are available as package deals at very beneficial rates.

We would be pleased to send you an individual offer quoting an attractive price.

### Your benefits

- Considerably shorter make-ready times (< 3 min. per changeover of blade)
- Higher productivity by faster bedding-in of the scraper blade times (< 2 min.)
- Lower cost by longer service life of the scrape blade

The Flexo scraping system is available for the coating machines 470, 480, 490 as well as 4040 and 460 with pneumatic scraper blade (see Upgrade 10.4).

Installation and commissioning of the upgrade to be performed by a qualified service technician from Koenig & Bauer. The labour, travel and accommodation costs, as well as daily travel allowances for the technician, will be charged separately as incurred.

Errors and omissions excepted.
