Upgrade 6.5

Sheet Guide Ramps for Unloading Machines – Smooth Transition!

At Koenig & Bauer, we are working continuously on innovations to further improve your printing and coating lines. With our hardware upgrades you stay up-to-date with the latest technological developments. In that way you continue to decorate metal sheets to the highest standards.

This specially designed sheet guide ramps support a damage- and trouble-free sheet transfer from the wickets to the discharge conveyer. The simple and precise adjustability of the ramps ensures a smooth transition to the following transportation elements. In addition, sheet contact with adjacent wickets is reliably avoided and even lightweight sheets are handled without deformation. Therefore, sheet guide ramps play a crucial role for a high quality production.

Your benefits

- Highest production quality
- Less waste sheets
- Higher productivity of the line

Sheet guide ramps for unloading machines are available for all sheet drying ovens.

We would be pleased to send you an individual offer quoting an attractive price.
