Upgrade 8.11

Additional Overhead Air Blast for Exact Sheet Stacking – Achieving Pinpoint Accuracy in Stacking!

With the innovative hardware upgrades from Koenig & Bauer, your equipment stays up to date enabling metal decoration at the highest level.

The “Additional Overhead Air Blast” retro-fit package is designed for Koenig & Bauer’s VacStack/MagStack type 806 modular stackers. This upgrade ensures exact sheet placement, especially with light or sticky materials, using pressurized air impulses by slot nozzles from above. This enables spot on release of single sheets for precise stacking, minimising disruptions and ensuring a reliable production metal decorating process.

What you can expect

- Accurate sheet release for best stacking results
- Reduced risk of delayed sheet-release
- Consistently precise stacking results
- Smooth integration
- Quick and easy installation

Your benefits

- Maximised production uptime
- Consistently high stacking quality
- Minimised material waste and rejects
- Increased uptime and less crashes
- Enhanced overall productivity

We would be pleased to send you an individual offer quoting an attractive price.
