# Upgrade 6.13 + 6.14 + 6.15 + 6.16 Venturi Sheet Transport

There is Something  
Special in the Air!

we're on it.

## Upgrade 6.13 + 6.14 + 6.15 + 6.16 Venturi Sheet Transportation

With the innovative hardware upgrades from Koenig & Bauer, your equipment stays up to date enabling metal decoration at the highest level.

Optimise your production with the Venturi sheet transport system from Koenig & Bauer MetalPrint.

When transporting coated metal sheets via belts and straps, scratches and contamination, e.g. from coat residues and particles, can occur. In addition, position deviations of the sheets can lead to downtimes and damage, especially at critical transfer points.

The innovative Venturi system eliminates these risks by allowing the sheets to float on a stable air cushion – without direct contact with the transport table. Only two vacuum belts ensure precise forward transport, which minimises scratches and ensures smooth production even at high speeds. In addition, there are no set-up times and the system is almost maintenance-free.

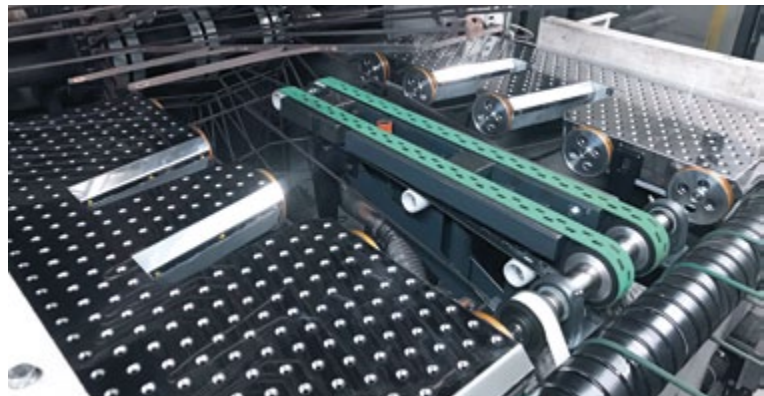

### The Venturi panel transport is available for:

- Loading and unloading machine (Upgrade 6.13 & 6.14)
- Delivery coating machine (Upgrade 6.15)
- Transport bridge (Upgrade 6.16)

We would be pleased to send you an individual offer quoting an attractive price.

### Good reasons to opt now for a Venturi sheet transportation system from Koenig & Bauer MetalPrint:

- **More uptime and less waste sheets**
  - Reliable and precise sheet transportation through the use of air nozzles and vacuum tapes
  - Less crashes thanks to perfect transfer and precise positioning and arrival of the sheets
  - Reduction in make-readies as there are no more sheet size adaptations necessary
- **Better quality and less rejections**
  - Less chances for scratches and contaminations of sheets
  - Less contact points between sheets and machine
- **Reduction of operational costs**
  - Less spending for wear parts and maintenance due to significant reduction of moving parts
  - Less cleaning efforts
